

Power and Reliability

We'll find the right solution for your next project, with our range of quality equipment.

About PR Power

PR Power is an Australian owned and operated company, specialising in the supply of a select range of quality equipment for industries including mining, civil works, construction, agriculture and power generation nationally and internationally.

PR Power provides you with access to the most reliable and competitively priced diesel generators, mobile lighting towers and water solution equipment available.

PR Power's equipment is also available for rental on short or long term agreements depending on your requirements.

To support the full range of equipment, access to a wide range of parts is also available.

PR Power offices are located in Western Australia, Queensland and New South Wales, with expansion

into other states and territories earmarked for the future.

Our Vision

To be the benchmark company in the Sales and Rental of power generation, mobile lighting towers and water & environmental solutions equipment nationally and internationally.

Our Equipment

PR Power continually seeks to source and supply quality manufactured, reliable and competitively priced equipment to meet the demands of its customers, for a range of applications and industries.

Occupational Health, Safety & Environment

PR Power takes all appropriate measures to protect the health, safety and welfare of its employees, contractors, visitors, customers and the wider community.

Equipment options that facilitate the

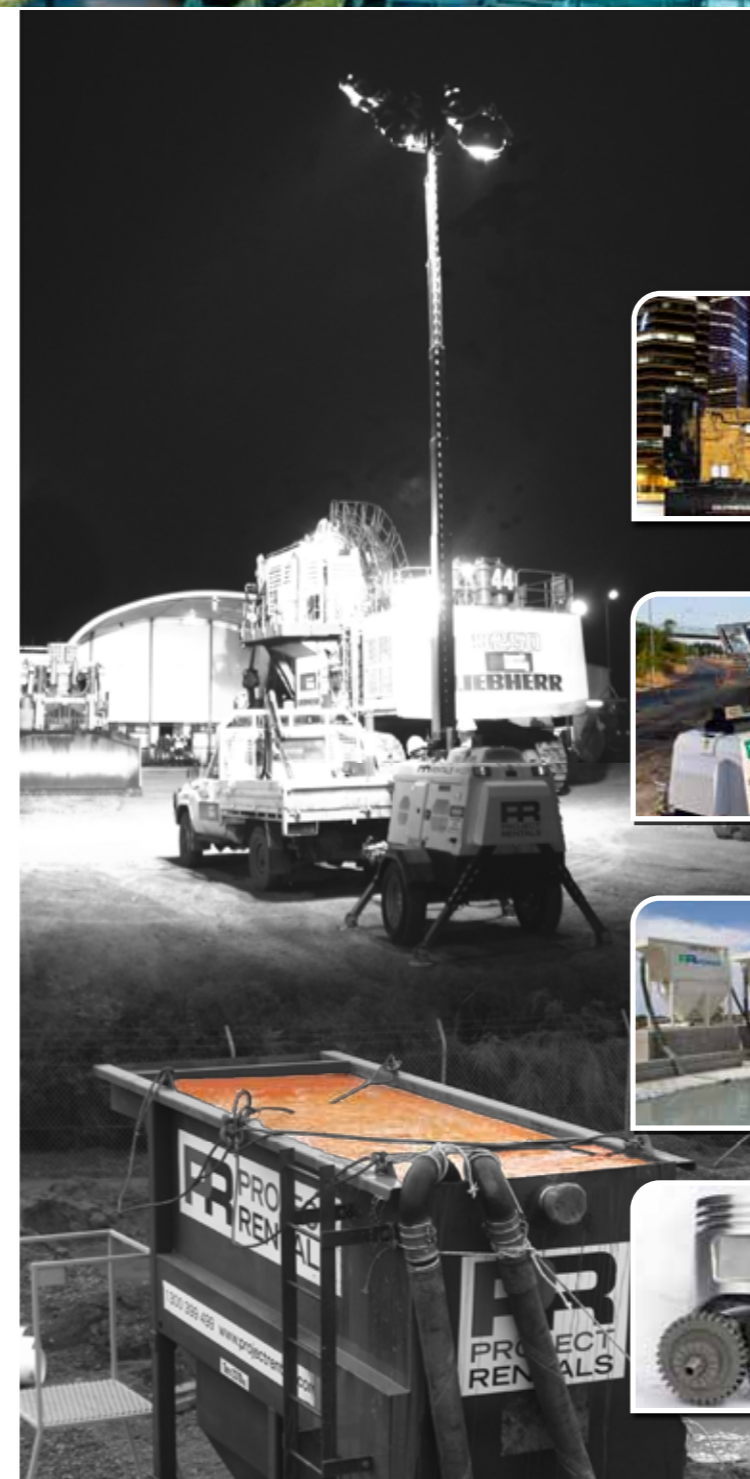

long term protection of the environment are available through PR Power, such as fully bunded and sound attenuated mobile lighting towers, generators and pumps, and water treatment systems that convert dirty and salty water into clean water.

Aftermarket & Technical Support

From installation to service and parts, PR Power ensures you receive prompt and professional support from experienced and knowledgeable staff for the full range of equipment Australia wide.

In addition to the PR Power branded equipment, we are the Australian distributors for Olympian Generators and Airstar Lighting Balloons.

The Olympian range of generating sets are supported nationally by the Caterpillar dealer network ensuring, competitively priced, genuine quality parts are available for prompt and speedy delivery anywhere in Australia.

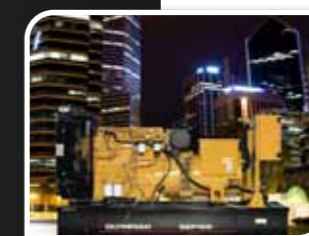

Equipment Range
