

PUMP RANGE

PR Power Pump Range

KEY FEATURES & BENEFITS

- Adjustable and replaceable front wear plate for easy maintenance
- Super silent models with noise levels as low as 67dBa@7m
- Fully bonded for environmental safety
- Rugged long lasting design, which includes volute in cast iron G25, oil lubricated mechanical seal and Shaft in hardened rectified steel 39NiCrMo3
- Diaphragm and Viton valves, which enables pump use for up to 2000 hours with no maintenance
- Industrial application diaphragm pump
- Refilling of water and oil not required
- Forklift pockets and central lifting points for easy movement and transportation
- No maintenance required on the pump
- Lockable access doors for added security

PUMP RANGE

The PR Power Dry Vacuum Assisted Centrifugal Pumps range from 4" to 8" complete with water cooled diesel engines.

The super silent vacuum assisted pumps are assembled with a 50mc/h high performance dry vacuum pump that guarantees rapid self priming.

The added advantage of the Dry Vacuum Pump range is the fact it doesn't require any type of maintenance to be performed on the pumps.

In addition to the PR Pump range, PR Power also provide a range of power generation, mobile lighting towers and water solution equipment for sales and hire.

For more information on our range of equipment contact our office today on **1300 399 499** or visit our website at **www.prpowers.com**.
